Hello, I tried to install Mac OS Sierra on my VMware Workstation 12, but the thing is, I could not see the Apple Mac OS X in the guest operating system (Step 4).. You can try it But remember that everything you have in your drive backups February 28, 2017 Hello Solomon Hey, so after extracting the raw file I get 2 separate files, which is a disk Image.. Thanks November 26, 2016 SpooderPutato I can not access my USB drive to replace the Config.. In addition to the OS X moniker, Sierra finally brings Siri to the Mac, along with picture-in-picture, updated photos app, Apple Pay in Safari, and the ability to unlock your computer with an Apple Watch.. plist file It gets FAT32 and everytime I try to open it says you have to format it before you use it etc November 25, 2016 Mukhtar Jafari I not sure, but if you follow this step by step guide, you should consider the USB need to replace config.
